

PARTICIPANT RISK ASSESSMENT AND DISASTER MANAGEMENT PLAN

PARTICIPANT DETAILS		
NDIS Number:	123456	
Given name/s:	Pugazh	Family name: Raman
Preferred name:	Pugazhenth	Date of birth: 13-02-2021
Address:	chennai	Phone No: 7896541230
Preferred contact method:	phone	Email: pugazhenth962003@gmail.com

KNOWN MEDICAL CONDITIONS OR ALLERGIES		
Specify	Effect	Treatment
BB	ANGER	MEDITATION
Lower pain	Herenia	surgery
HeadPain	pain	sleep

EMERGENCY CONTACTS / CARER / GUARDIAN		
Name/s:	Phone:	Email:
jerome	787945464	jerome@stigmatatech.com

PERSONS INVOLVED IN RISK ASSESSMENT		
Was the participant involved in the assessment?	☐ Yes ☒ No	Reason: no need here
Staff Involved: Anand Sekar		
Others Involved: Sharon and Other staffs		

INDIVIDUAL RISK ASSESSMENTS				
No.	Item	Y/N	Risk Rating	Comments/Controls
1	Does the participant have any allergies?	☒ YES ☐ NO	1	No Problem at all

INDIVIDUAL RISK ASSESSMENTS				
No.	Item	Y/N	Risk Rating	Comments/Controls
2	Does the participant have any dietary requirements?	☒ YES ☐ NO	1	
3	Does the participant have any medical conditions?	☒ YES ☐ NO	1	No Problem at all
4	Does the participant require any assistance with personal care?	☐ YES ☒ NO	2	No Problem at all
5	Does the participant require any assistance with mobility?	☒ YES ☐ NO	2	No Problem at all
6	Does the participant require any assistance with communication?	☒ YES ☐ NO	2	No Problem at all
7	Can the participant travel in an unmodified vehicle?	☒ YES ☐ NO	1	No Problem at all
8	Can the participant use public transport?	☐ YES ☒ NO	2	No Problem at all
9	Is the client known to be affected by crowds?	☒ YES ☐ NO	1	No Problem at all
10	Is the client affected by noises or sudden sounds?	☒ YES ☐ NO	1	No Problem at all

INDIVIDUAL RISK ASSESSMENTS				
No.	Item	Y/N	Risk Rating	Comments/Controls
11	Is there a history of any family members with behavioural issues?	☒ YES ☐ NO	1	yes
12	Does the client have mobility issues?	☒ YES ☐ NO	3	Is there a behaviour practitioner involved? YES NO
13	Have hazards associated with showering, sponging and toileting been considered?	☒ YES ☐ NO	1	Is there a behaviour practitioner involved? YES NO
14	Does the participant take any of the following medications that can cause Respiratory Depression? (Benzodiazepines, Opioids, Polypharmacy, Psychotropic polypharmacy, Combination of any of the above medications)	☒ YES ☐ NO	2	Is there a behaviour practitioner involved? YES NO

MEDICATION

Management of Medication
Should any of the below be marked as YES, refer to Form 24. Management of Medication Prompt Medication Required ☒ YES ☐ NO Assistance of Medication Required ☐ YES ☒ NO Administration of Medication Required ☐ YES ☐ NO

Participant Dependency and Health-Safety Risk Assessment Table

Steps to Use the Extended Table:

Assessment: Evaluate both the level of reliance on your services and the potential impact on health and safety for each participant.

Categorisation: Assign the appropriate risk level based on the combined assessment of reliance and health-safety impact.

Mitigation: Develop strategies and contingency plans that address not only the level of reliance but also the specific health and safety concerns identified for each risk level.

Regular Review: Continuously review and update the risk assessment and mitigation strategies, considering any changes in participants' needs and potential risks.

Communication: Ensure that all stakeholders, including participants, families, and your team, understand the dual assessment of reliance and health-safety impact, as well as the corresponding mitigation plans.

Emergency Planning: For participants with higher risk levels, develop emergency plans that outline steps to be taken in case of service disruptions or unexpected events.

By considering both the participants' level of reliance on the services and the potential consequences for their health and safety in case of disruptions, we can create a more comprehensive risk assessment framework that prioritises their well-being. Therefore, prioritising the health and safety of participants is a fundamental responsibility that promotes their well-being, respects their rights, and contributes to the overall success and sustainability of various activities and endeavours, and ultimately, the level of support the provider is required to provide the participant during their care.

Selected Risk Level	Description	Criteria	Impact on Health-Safety
Moderate	Participants have a moderate reliance on provider services for certain daily living needs.	Participants can perform some daily activities independently but rely on the provider for specific tasks such as transportation, meal preparation, or medication management. A disruption in services would moderately impact their well-being.	Disruptions in services could moderately impact participants' health and safety, particularly for tasks they rely on the provider for.

Participant household safe meeting point in case of emergency	
Address:	Chennai
Description:	House

IF RISK IS IDENTIFIED, PLEASE DISCUSS WITH THE MANAGER

CONTROLS TABLE			
Issue	Score	Control	Person Responsible
End the day with a short retrospective. Note what went well, what didn't, and one or two improvements to try tomorrow. Clear your workspace and set up the first priority for the next day so you can begin immediately. Over weeks, these small adjustments compound into significant gains in productivity and wellbeing. This routine is intentionally adaptable. Tailor session lengths, break types, and task order to match personal rhythms, team schedules, and project demands. The core idea remains the same: plan deliberately, protect focused time, move intentionally, and reflect regularly. Use this passage to test your systems — typography, layout, copyflow — and adjust as needed.	1	End the day with a short retrospective. RISK ASSESSMENT MATRIX

Consequence		Insignificant (1)	Minor (2)	Moderate (3)	Major (4)	Extreme (5)
		Participant - potential Injury Lost time or illness of <5 days Visitors - No Treatment or refused Treatment, Services - Minimal Disruption Financial - Loss of <\$5000 Environmental - Fire alarm from Faulty equipment	Participant - First Aid attention Lost time or illness of 5 to 10 days Visitors - First Aid Attention Services - Disruption to some users Financial - Loss of \$5K -<\$10K Environmental - Small fire from faulty equipment	Participant - Medical Attention by a GP Staff - Lost Time for >11 days or restricted duties Visitors - Medical Intervention Services - Disruption to all users Financial - Loss of \$10K < \$50K Environmental - Fire contained to a room	Participant - Permanent Loss of Function or Disfigurement; Absconding Participant; Sexual Assault Staff - As per Participant Visitors - As for Participant Services Major Loss of services to all users Financial - Loss of \$50K -<\$100K Environmental - Fire Grows larger than one room	Participant - Death or Hospitalisation Staff - Death or Hospitalisation Visitors - Death or Hospitalisation Services Complete Loss of services to all users Financial - Loss of >\$100K Environmental - Fire Requiring Evacuation.
Likelihood						
Rare (1)	Unlikely to reoccur- May occur in exceptional circumstances	1	1	2	3	3
Unlikely (2)	Possibly could reoccur at some time in 2-5 years	1	1	2	3	3
Possible (3)	Possibly will occur at some time (may happen in 1-2 years)	1	2	2	3	4
Likely (4)	Will probably occur in most circumstances (several times a Year)	1	2	3	4	4
Almost Certain (5)	Is expected to occur again either immediately or with in a short period of times (likely to occur most weeks or months)	2	3	3	4	4

Type of support to be put in place in the event of an emergency or disaster and how we will support the participant (based on the Service agreement)	
Emergency	Support provided to the participants in the event of an emergency
Infinity is unable to support for extended period	Infinity will assist the client/family to source alternative providers
Client taken ill during support.	Call 000, Call family, take to nearest ED
Closure of business	Infinity will assist the client/family to source alternative providers
Pandemic	Client will reside with family, have essential supports and daily phone check-ins

What to do in an Emergency	
Evacuation Procedures	FIRE
• Upon hearing the alarm or when the situation requires evacuation • Prepare to evacuate; shut electrical/gas if safe • Close doors for fire; leave doors open for bomb threat • Assist participant in immediate danger • Leave the building via the nearest safe route • Obey all directions from emergency services • Move calmly to assembly point • Follow closely the instructions of emergency services personnel and campus wardens • Wait for the OK to re-enter the building	• Ring 000 and provide details of the fire then ring supervisor • Assist any person in immediate danger only if safe to do so • If safe to do so, close doors to minimise spread of fire • Attack the fire only if safe to do so • Contact the nearest warden and follow their instructions (if applicable) • Assist with evacuation of participants with mobility issues • Move to the evacuation location in plan and stay there until all clear has been given • Follow closely the instructions of emergency services personnel and campus warden
Medical Emergency	Civil Disturbance
• Do not move a participant unless they are exposed to a life-threatening situation • In emergency situations contact the ambulance service by dialling 000 then ring supervisor • Arrange for the ambulance to be met • Remain with the participant and administer first aid as appropriate until assistance arrives • Follow closely the instructions of emergency services personnel	• Keep well clear of the disturbance and do not say or do anything that may encourage irrational behaviour • Consider locking down the building to prevent unauthorised entry • Follow closely the instructions of emergency services personnel and campus wardens • Evacuate the building only if instructed to do so by emergency services personnel or campus warden
Extreme Weather	Personal Preparation
• Keep participant informed of situation • Move away from windows and turn off electrical appliances to ensure safety • Follow closely the instructions of emergency services personnel • Evacuate the building only if instructed to do so by emergency services personnel • Keep in contact with supervisor and follow their instructions	• Know the location of emergency exits in your building • Plan an escape route from the premises to safe environment • Identify and familiarise yourself evacuation point or a safe location • Familiarise yourself with location of any break glass fire alarms • Note location of fire extinguishers • Familiarise yourself with the identity and location of the first aid kits

Mode of Communication assessment for non-verbal participants (e.g., Sign language, pictures, body movement)	
Possible scenarios of concern	Mode of communication
In the afternoon, tackle tasks that require collaboration or communication. Use the time when others are active to schedule calls, review feedback, or resolve dependencies. Reserve late afternoon for lower-energy tasks such as administrative work, email triage, or small maintenance items. This matches natural energy cycles and helps preserve peak cognitive hours for the hardest work.	Phone
